

The Pledge

By the New Group of World Servers

We, the humanity,
perceive the simultaneous double movement in Synthesis.

We, the humanity,
accept dissolution of the undesirable
and thereby its elimination.

We, the humanity,
invoke simultaneously percolation of the Energy of Synthesis
into the governments of the world.

We, the humanity,
invoke from the subtle to the gross
immaculate concept of governing the world
and evoke from the gross to subtle
the divisive forces.

We, the humanity,
join with heart and soul the Hierarchy
in building the New World Order.

Let the three devas of Light, Love and Power restore the plan on Earth.

OM SHANTI - SHANTI - SHANTIHI

Commentary

This is a pledge of the groups of good will to be ready for transformation. We declare that we are ready to cooperate in accordance with the Plan of Hierarchy to dissolve the undesirable and to receive what is desirable.

It is recommended to utter this pledge at new moon individually or in groups. Each approach to the new moon means dissolving the present and developing something new. We are in a very critical time. If interested, we can make this contribution of good will.

Our contribution might be like a grain of sand but even this grain of sand is accepted. We should not expect that we can do more than this. We should face the facts, remain humble and not assume greater dimensions of our work. When we build a good thought on the mental plane, it will find its own way of expression.

The symbol of synthesis shows a circle which is open downwards. There is a V indicating the descent of the energy from out of the circle. The tip of the second V is pointing upwards and is also embedded in the circle. These two movements – one directed downwards, the other directed upwards – were received as the downpour of the energy of the Avatar of Synthesis. One movement can be seen as the downpour of the Energy of Synthesis, the other as the lifting-up of the humanity. The double movement refers to this.
