Invocation

May the light in me be the light before me.

May I learn to see it in all.

May the sound I utter reveal the light in me.

May I listen to it while others speak.

May the silence in and around me present itself,
the silence which we break every moment.

May it fill the darkness of noise we do,
and convert it into the light of our background.

Let virtue be the strength of my intelligence.

Let realisation be my attainment.

Let my purpose shape into the purpose of our earth.

Let my plan be an epitome of the divine plan.

May we speak the silence without breaking it.

May we live in the awareness of the background.

May we transact light in terms of joy.

May we be worthy to find place in the eternal kingdom OM.

Prayer of the year 2017/18

BLISS IS IN GIVING AND NOT TAKING.

SUN GIVES LIFE. HE IS MAN.

MOON RECEIVES. SHE IS WOMAN.

Full Moon of Cancer, 09th of July, 2017, 06.06 am

Message of the Month of Cancer

Entry of Sun into Cancer should remind aspirants to think of a lighted body. The dictum is "I build a lighted house and dwell therein." Cancer is the sign for entry of souls into envelopes of forms. If the envelope is subtle and transparent the light of the soul continues to shine forth. If the envelope is coarse and dense, the light of the soul gets hidden. The birth of soul to the matter is like a lamp in an earthen pot, covered at all sides. The light within cannot be seen. The matter of the pot obscures light and disables light to shine forth. The matter has to be refined; it has to be so refined to be a glass jar. The matter then tends to be transparent and subtle. Through a glass jar the light shines forth within and without. Such light enlightens.

Born in a body of flesh and blood and such other tissues as bone and skin, man is required to refine his body through right thought, speech and action so that the matter of the body tends to be supple, subtle, magnetic and radiant through time.

Transforming matter requires a strong will. The matter of the earth is considered to be the densest of the matter. It yields not easily. To impregnate the matter, penetrate into it and transform it. The will of man requires to be supplemented. He therefore ardently seeks the support of a teacher. The teacher in modern times himself relies on the energies of Uranus, which is a deeply penetrating and permeating energy. Invocation of the energies of Uranus significantly assists in transformation of the body matter. The seven tissues are transformed faster by such invocation.

The Aquarian age demands that men link up to Uranus and gain the needed transformation. The sound C.V.V. is the key for such invocation of the New Age energies, namely energies of Uranus.

The traditional astrology speaks of Moon, Mars and Saturn as the beneficial planets for discipleship. But the New Age astrology suggests that the aspirants may associate with Uranus through regular invocation to enable quicker transformation. Uranus stands as the global transformer as also groupal and individual.

Message of the Teacher

The Veil

Humans are crazy to look for God. It is an unending engagement. The mystery of God eludes as long as man tries to look for something which is mysterious.

The wisdom says that the form of the universe and the various forms in the universe are but the form of God. Form is the veil. Behind the form are the qualities. Behind the qualities there is the Light of God and behind such Light is God as I AM. It is therefore necessary for seekers of God to respect, to comprehend, and to unveil the veil after veil within oneself and in the surroundings. Such is the path.

Utterances of Lord Krishna

In fulfilling your ordained duty,
If you die, you would move to better life in next birth.
If you fulfill the ordained duty in Life, you are uplifted from conditioning
and move into the path of Light.
Either way it's beneficial to devote yourself to ordained work. (2-38)

In fulfilling the ordained work,
Care not for comfort or discomfort, profit or loss, success or failure.
What is to be done shall have to be done. (2-39)

Message of Lord Maitreya

Think Big

Never think that you are earthy. Each one of us is universal, and eternal. To think that we are earthy, that we are Asian or European or African or American or Australian is a substituted truth. We, the universal ones, are in a journey and in that journey we are on Earth. We need to move on fulfilling the purposes on Earth. In a long journey, when you stop over at way-side for tea or coffee or for snacks, don't we rejoin the travel? Is it not ignorance to settle down at the coffee shop washing the cups and saucers? We the humans settled deep down into the substituted truth and lost ourselves. Humans need to think big. They stopped thinking so. Instead they enter into the quagmire of illusions and imaginations. Every big thought we follow results in big action. Only through action we grow big, not just by mere thinking; no one can become good by thinking good. It is action which transforms one to be grown. The universe is a field of action but not just a field of thought. It is called Kurukshetra meaning field of action. Action is the basis for all transformations in either way. Limiting oneself only to thinking imbalances him. Thoughts have to be balanced with action. Thoughts of goodwill should be brought into actions. Action is the key, it is the Master key. Through creative thinking and action one continues to grow and such growth should lead us into realms of light. The humans developed routine thoughts and routine actions. They therefore remain like the rodents that move around the mill. Long ago they forgot the journey which they initiated. Each man should think big to grow.

Message of Master Morya
- Maruvu Maharshi -

Courage

Where there is life, there is heart. The heart is the transforming centre. It transforms used life into fresh life. The heart knows the economy of life. It recycles life and makes it fresh, on an ever continued basis.

Where there is heart, there is compassion, sympathy, and love. Even a wild beast demonstrates such compassion, sympathy and love towards its siblings.

Where there is compassion, love and sympathy there emerges nourishment of the surroundings. When nourishment of the surroundings is done with either of the three qualities, such an act is divine. Such acts are never done with a commercial mind. No parent ever thinks of the money that the parents spend on the child as a commercial investment. Heart knows not commerce; heart has no worldly evaluations. It has no expectations even.

Where there are commercial evaluations and expectations there the heart is under seize of mind. The mind is worldly, the worldly men have an option to liberate their heart from their mind and become Masters. Courage enables such a step.

Master Koot Hoomi
- Devâpi Maharshi -

The Health Key

Heart holds the key to pure life, a healthy life. If heart is awakened it finds its own fountain of vitality and maintains the body. A pure heart does miracles. Treatment to heart is what Raja Yoga proposes. When the heart is purified of malices such as desire, anger, attachment, pride, prejudice possessiveness, hatred, such heart can rejuvenate the mental, vital and physical body and ensure life of optimal cycle.

Yoga has only one treatment for health; that is, developing pure heart. A pure heart opens doors for invisible forces to express into the visible world and visible forces to get absorbed into the invisible world.

Among all your practices for discipleship the central theme is developing a pure heart. All other elements of discipleship are secondary to developing a pure heart. Engage not yourself in sundry health practices and sundry practices of discipleship. Engage yourself with the heart and its rhythmic breathing; it sets the needed equilibrium.

Message of Master *EK*

The Importance of Discriminative Will

Wisdom is the product of discriminative will in action. Discriminative will enables comprehension of not only right and wrong, but also what is mutable and immutable. Such will enables creativity as well. Creativity nourishes the soul and contributes to growth of personality in tune with the soul.

A life where discriminative will is either absent or not utilized tends to be one of misery, of fear and of sorrow. The absence of discriminative will in action disables right thinking. It promotes unending useless ideation which is indecisive.

When man uses not the discriminative will there is no way for him to grow.

TO GET IMPREGNATED

In the Vedic symbolism the Horse stands for life force. The Bull symbolizes the solar ray of the descending Word. The cow represents Mother Nature; the Snake represents the cycles of Time, and so on. Most of the zodiacal signs have animals as symbols. The horse is one of the symbols of the sun sign Aries. The head of the Horse is said to be Aries, the body of the Horse is said to be the sun sign Leo and the tail of the horse is said to be Sagittarius. It is a triple manifestation of life, through fire.

In this context, it is said: "The horseman is impregnated by the heavenly Word". What is this horseman? Each one of us is a horseman, meaning,

that we have a body based upon the life force functioning in us. If the life force disappears, however strong and beautiful our body is, it falls. Therefore, all living beings are defined as existing in the ONE, moved through the force of life, which is the power of the horse. All live in their respective bodies by means of the life force flowing through them. As life force functions, the body functions and man experiences the splendour of the Creation.

By following the science of wisdom we stand liberated while we live in the body. We learn to live with it. When the wisdom science is ignored, we live in the body, conditioned by it. The person conditioned by the body suffers and suffers death too. The person mastering the body lives with it, like a true horse-rider. He mounts on it and moves on. The conditioned one is like the centaur, man as centaur is a conditioned man, the man on the horse is a liberated man. The former is less evolved and the latter is more evolved

Message of Sri Ramakrishna

Sectarian Quarrel Disappears

The consciousness of self is of two kinds;
One ripe, the other unripe.

“Nothing is mine, whatever I see, feel, or hear, even this body itself is not mine. I am always eternal, free and all-knowing” – such consciousness as this originates in the ripe ego; while the unripe ego makes man feel himself for ever related to the transitory things of the world. “This is my house, this is my child, this is my wife” – consciousness like this is the manifestation of the unripe ego.

PRACTICAL WISDOM

Man is conscious while other species are not.
They are in harmony, but unconsciously,
man is conscious but not in harmony!

On Secret Doctrine

Atlantis

“Atlantis” is the Fourth Continent. It would be the first historical land, where the traditions of the ancients received more attention than they have hitherto. The famous island of Plato of that name was but a fragment of this great continent.

(This continent was occupying that part of the globe which is seen today as the great Atlantic Ocean. The eastern part of North and South America was part of this great land, while the Western part of the North and South America were part of Lemuria. Even today the western part of North and South America vibrate differently, from that of the Eastern part of the two continents. The Western part is more ancient, and was part of Lemurian culture while the Eastern part is from Atlantean times, with a distinct difference in culture.

The Lemurians brought down Knowledge of Fire, of Yoga and of Will and laid down the Laws of Life. The Atlanteans growing in such Knowledge tended to be proud and arrogant. The consequence was misuse of knowledge resulting in its destruction.

The Islands in Pacific and Indian Ocean are remnants of Lemuria while the islands of Atlantis are the remnants of the land of Atlantis. What is today known as Mexican nation was extending from North of California to Miami and to the islands in the Caribbean Sea.)

Saturn

Saturn Rings Illusion - Protection

Protection 1

Saturn is the principle that covers the original and gives us the illusive existence of something different from it. We will say that there is 10 grams of gold in this ring, but the truth is, there is no gold in the ring. It is the gold that has become a ring. We say that we are the body and we have a soul. All of us say, "We have a soul." The right understanding is, we are the soul and we have the body. That is the Saturnine limitation that makes us see the form or the substitute and makes us forget the original. The second phase exists as a necessary limitation to all created beings. This limitation is the effect of a ring, and the ring is the cosmic principle of Saturn located in the planet Saturn. This limitation which we suffer is a necessity in creation. The limitation is the protection till we have a greater understanding. When we observe the growth of a vegetable from the plant, the previous state to it is a flower. It is the centre of the flower that transforms itself slowly into the vegetable, and the petals of the flower protect the vegetable. The more the vegetable grows, the petals give way for the vegetable. But when the vegetable is in the infant state, the petals protect. Likewise, we have the eggshell of the chick. The shell is a protection for the chick till the chick grows. When the chick grows completely, the shell is broken.

So also the protection of the mother to the child. The mother conceives, delivers, nurses, nourishes and brings up her child. She gives love and care and shares many things. But if the mother wants to possess the child, it goes against the Law of Nature; hence, she suffers. It is the Law of Nature that we should allow to proceed that which comes out of us. Till it proceeds, it is protected. After we see it progressing, we should stay back, relax, witness and experience it.

Discipleship

The Qualities of Sound Mind

Vision

Vision is spiritual perception, the power of the illuminated mind to see; it is the spiritual correspondence of physical sight. Sight is the greatest physical gift, and it is the same in the world of the soul. Physical sight reveals the phenomenal world; the eye of vision reveals the subtle world. Our vision determines our lives. Hence, the necessity for clear vision; it is a God-ordained objective. The biblical statement that 'where there is no vision, the people perish' is a scientific pronouncement. Those who lack vision are headed toward confusion, evil and pain, failure, danger and disaster. Man is concerned with the immediate foreground and loses the long-range goal of spiritual evolution and achievement – entirely dependent upon the effects of vision. Vision is connected with the recognition of that which lies ahead, with the future possibility, with the remote yet the attainable. It sees beyond what is to what might be. A man's vision is as much of divine truth and of the divine plan as he can grasp; it is a moving point progressively advancing. Greater light and a higher altitude give a wider range of vision, creativity and goals. Where it is present divinity can begin to emerge. Circumscribed and clouded vision characterizes most of us. How little we see is astounding! Even the best of human beings are superficial in their visions and their judgments. They refuse to see anything but that to which they anchor their emotions, desires and mental perceptions. Vision does not come to a mind which is attached, limited, over-satisfied, filled with pride, immersed in the material and physical life or where there is violent emotion. Nor has anyone a clear vision who is obsessed with their own needs, actions and interests, who lacks a spirit of inclusiveness, who is unconscious of that which is higher. Clear thinking, knowledge, discrimination, dispassion and selflessness clear the channel for the inflow of vision.

The Teacher 29. Aprati Rupakam

Devoid of Copy

There is no copy to the original in creation. The original is always original. You may find similar beings but not the same. To start with, Atman or the Self, as said earlier, is no form essentially. Nature may gather forms around it. When it is formless, there is no such thing as comparing to one another.

There is no comparison to the sky which is formless. When there is no form, it is just One, there is no other. Hence, there cannot be a copy to it. Even the formations that happen around the Atman are also not 100% copies. A dog can be differentiated from another dog. A man can be differentiated from another man. A tree can be differentiated from another tree. There can be similar forms relating to humans, animals, plants, devas etc. But there cannot be the same form. Even twins can be distinguished. Nature's creation is original. The Atman too is original.

A Teacher who regains his originality through self-realization remains original. He cannot be a copy to another. Every Teacher is original. He does not copy or imitate his predecessor. He may follow the same principle but he would not be a copy mutatis mutandis. A Teacher is an original role player, even while he follows the path of the predecessor. You do not find any Teacher of consequence who is a copy to his predecessor. His thoughts, speeches and actions remain original.

It is a never before situation with the Teacher which is called Apoorva. In truth no one can be a copy to the other. Krishna was not like Rama. Buddha was not like Krishna. Pythagoras was not like Buddha. Jesus was not like Pythagoras. No two Masters are alike in the Hierarchy, although

they work in unison.

There cannot be a reappearance in the same manner. Many devotional students who are also slightly emotional, look for a reappearance of their Teacher. Even if he reappears, they cannot cognise because they look for the same form which never happens in creation. The students can gauge a reappearance only when they are familiar with their Teacher's energy. The students also drift from the path in imitating the Teacher instead of following his principles. The students should know that they are also originals and then need to find the comfort of being original while following the principles on the path. You may remember that your Teacher is original and not copyable. By this he gives a message that you too are original and to be original.

Also remember, "To be original is to be spiritual."

Very early in the morning I recollect the holy sandals of the Master in the inner chamber of my heart.

Kapila

Heaven - The Temporary Abode 1

There are people who build the triangular life activity with proper understanding of law, desire and natural wealth. They conduct well, in tune with the Natural Law, gain natural wealth and fulfil their desires.

They worship the intelligences in Nature as various deities and conduct rituals, sacrifices and activities of service. They gain name and fame in the society and are recognised as men of goodwill. They embark upon the lunar path to experience the splendours of Mind - individual and universal (heaven). They spend away their fruits of good acts and return to Earth. The aforesaid triangular activity is not faulty or forbidden. But it has the cyclical limitation of ascent and descent through time. The desire for happiness dominates their actions. It is this desire that motivates them into good actions for good results. It is the path that leads to personality growth; name, fame, family, wealth and property bulge to condition the being. And the being starts functioning to maintain them.

He has to carry out acts of goodwill according to the social expectations. He has to mould his speech, actions, movements and even attire according to the social expectations. The society has moulds developed from the past memory of men of goodwill, and the man walks into the trap to be recognised as a good man or even as a God-man! The happiness is lost as the freedom is lost. Life is no more a 'free-style dance' but becomes a dance according to the tunes of the audience. The path to heaven leads to hell in terms of one's own happiness. The loophole in this path is - working and living according to others' expectations to gain their appreciation. It is the path of pleasing others.

The Four Dogs 2

As said earlier, the Christians conceived the fourfold Existence and adopted the cross, which is again a Vedic symbol. They have also conceived 4 gospels, to fall in tune with the 4 Vedas (the 4 Vedas speak of the 4 aspects of the Lord, while the 4 gospels speak the same story of the Initiate Jesus Christ).

The 4 Vedas speak of the expression of awareness as Rig Veda, the Song of Life as Sama Veda, the plan of work as Yayur Veda and action and the related manifestation as Atharva Veda, in great detail. They are not comparable to the 4 gospels. The scheme of the 4 Vedas is briefly as under:

Rig Veda speaks of the emergence of awareness, its ideation as divine thought and its manifestation as speech. Awareness emerges from Existence, details into Trinity and utters forth the 7 planes of existence. This is the work of the Word which is elaborated in great detail in Rig Veda. Even in the human being, his awakening, his perceptions (inner and outer), his conceptions, his speeches and actions are nothing but the uttering forth of himself. This is the Rig Vedic part of him.

The Sama Vedic part in the human being exists as Nada, which details into life force, conducts pulsation, heart beat, respiration and circulation of blood.

The Yayur Vedic part in the human being is, making a plan out of ones own conceptions before been executed. Unless there is a well laid out plan for action, the actions do not yield the related joy. Yayur Veda speaks of such plans before every action.

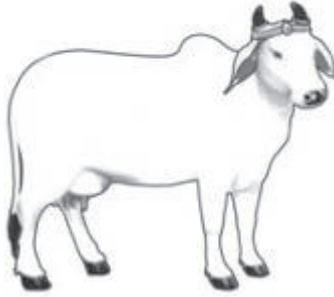

The Atharva Vedic part in the human being are his actions and the consequent creation, which is his. As it is with the Lord so it is with man. The knowledge relating to the 4 aspects relating to man in its detail would lead him to himself.

Fire

The Laws of Fire 1

The Trinity are represented by the functioning of the three Laws of Fire. The essence of Trinity is Fire. When Trinity manifest three Laws function through them. They are named in English by Master DK as the Law of Economy, the Law of Attraction and Repulsion and the Law of Synthesis. The Matter, its formation and its manifestation are all governed by the Law of Economy, presided over by Creator (Brahma). This Law distributes matter through scattering of atoms and through their disassociation with one another. The atoms are separated and segregated and heterogeneity is created. That is how the forms are made different from one another. Their action is also made different. The Law also causes rotation of Matter. The Matter's activity is seen as rotary activity. The second Law governs the Soul with its pairs of opposites. Spirit and Matter are the two opposing poles when the Law of Economy comes into operation. The second Law works out gradual approximation of the two poles. Matter and Spirit are brought together to be presided over by the Soul. In the approximation process there is a lot of attraction and repulsion. Since Matter and Spirit operate in two divergent ways, there is pull and push. The whole creation is held through polar opposites. The opposites are to be realized as complementary. This Law presides over the activity of finding the complementary nature of the seeming opposites. This is considered as the Law of Attraction and Repulsion. This Law is presided over by Vishnu, the second Logos, while Brahma is the third Logos.

Role Play 2

People foolishly identify themselves with all that they do and sink in it. There are people who believe that they are bankers, businessmen, doctors, professors, teachers, scientists and there yet others who feel that they are Gurus, Masters. All this is ignorance. To oneself, all these are roles played. One is I AM, just I AM. Even this I Am is a concept. It disappears in the advanced states of enlightenment. The teachers of Advaita say that the first illusion is I AM, and all the identities that are built around it are worse illusions.

I AM is but a projection of that One Consciousness, which permeates all. It is the Universal Consciousness that projects as an individual consciousness. Just like the ocean projecting a wave. The wave is but ocean only. The wave has no identity by itself, but for the ocean. The individual awareness is but a periodical emergence, like a wave from the oceanic consciousness. Wave is but a concept of the ocean, a momentary projection of the ocean. It appears and disappears. The wave also builds its foam through its activity. In the foam there is hardly any substance. The substance of the wave is ocean, but the substance of the foam is illusory. Wave is I AM, and other identities one suffers from are like the foam. They have purely momentary value from the standpoint of eternal time.

The Fruits of Tomorrow

Question: Dear Master, how do you see the future of humanity until the next quarter of the century?

Answer: Dear brother, look not so much into the future with speculation and with hope. Live today as your soul dictates. Do not slip yourself into being a day dreamer and a lazy goose. See what can be done here and now and engage yourself in some fruitful work. What you sow today comes back to you as a fruit in the future. If you just speculate of the future fruits and sow not any seeds now the fruits are never seen. The fruits of tomorrow are the outcome of the seeds you sow today. Make sure that you keep sowing the right seeds; care not of the fruits. Eventually the fruits emerge from the sown seeds which should benefit the posterity. Such ones are the builders of the society, such ones are the disciples. May you join such group of disciples.

Opening the Doors

It is verily the gate for the higher existence. We can say, this door is in the whole hall the only best way to walk out. So, there is a key to open the door. In so far as we don't know the key, then we feel the fear of it. And we should go into the detail of the fear, and then give the solution. Every initiation is preceded by a fear, a depression or a difficulty. As you go inside, naturally that which is obstructing the contact, will first show off. And those can be overcome with greater dosage of light. It is not pushing light from outside. It is a process of making the soul within to radiate more. Then the door opens from the other side. Whenever an important person walks, people keep opening doors to him from the other side. We don't have to open our own doors. So, you must learn to teach him or her about the soul, the beauty of the soul, the radiance of the soul, how the soul can break through from within outside. There is no need for us to make an entry from outside within. It is unfolding from within outside. We can suggest: 'Let the person imagine a golden jewel in the heart centre and its unfolding or radiating from the heart centre all over the body, followed by radiation of the orange light of the morning.' So, the unfoldment of golden light followed by orange light from within the heart centre, which you can witness during the sunrise hours, then from within the fear is dispelled. And you can also give a sound to the person. The sound for the golden light is 'HA', and the sound for the powerful orange light is 'RA'.

Vishnu Purâna CHAPTER XXI

Details of Creation

The three powers emanating from that Brahman are called Brahma, Vishnu and Siva. The lesser emanations are the Devas and the Prajapatis, like Daksha. Their lesser emanations are the mental beings, of whom the humans are the foremost. Down below them we find the emanations called Pasus (beasts bound by the ties of instincts to the pole called behaviour). Then there are animals, birds and reptiles. Down below them we have the trees, shrubs, plants and herbs. This whole creation is one indestructible totality (although forms appear to be destroyed every day). This whole indestructible creation has its alternations, such as emanation and disappearance, birth and death. All these powers are the emanations of the One Power and this Power fills the existence of the One who is the Lord of Pervasion and who is the Highest Lord of expansion.

All this is meditated in all its forms and details by the practitioners of Yoga, as they begin to meditate. This meditation is called the meditation with a strong-hold. It is the meditation on the germinative aspect of Brahman. The meditator has to link up all this with his mind, then the mind becomes one without any obstacles. The cross-currents of the powers merge in the mutual interactions of the same powers by meditation. This is the Brahman aspect of form that belongs to Hari, the manifestation of Vishnu. All this is being woven, warp and woof, on the background of the one whom we call Vishnu. Hence Vishnu sustains all this world in its twofold aspects, changeable and unchangeable. All becoming of this creation is made up of Him and Himself as the Indweller, while all this making serves as His ornaments, as well as His weapons."

The Path to Knowledge and the Path to the Truth

Only people who live by certain high values, they become role models for others. If they had not demonstrated such high values, we would not have taken them into our hearts. What is the basis for our respecting them? The values they stood by! So the values have to be promoted and the orientation should be towards the values. Instead, the ignorant followers orient them to the personality of the teacher. The chance of not appreciating the values and not following the values is high when you become a crazy follower. The following is due to the existence of values in a person. The worship is towards these values.

Why do we appreciate gold? There are certain energies in gold, which are beneficial to us. If those values don't exist, gold has no value. Slowly there is a danger of ignoring the values but becoming a personality worshiper. That's how all these religions have come.

Before the advent of Christianity, there was no religion. Religion is of recent origin. Earlier there was the search for Truth. Each one may find its own way to the truth, and whatever he experienced, he gave it to others. This is how my pursuit after truth gave me the knowledge. It was not imposed on others. This is how I found it.

Likewise there were varieties of ways found. People got inspired that, if there is will, there is way. The way is in you. According to your conscience, you follow that which you think is the right way. During the course of time, certain ground values are accepted by all persons. They found that in any path there are certain ground rules which seem to be necessary, if we have to progress on the path to knowledge or truth. They are essentially considered to be ten, and all these ten appear in every teaching of the Master. In some cases, however, emphasis is given on one of these ten points.

Understanding The Needs of The Body

A refined understanding of the needs of the body is imperative in the present day context. The demands of the body in terms of drink and food and also in terms of its other appetites shall have to be carefully noticed. Such demands shall have to be duly honored in so far as they are not contrary to the general well-being of the person. Denial of such demands could cause a dent in the psyche, resulting in certain deficiencies, leading to sicknesses. Sometimes, a saint may get an impulse to smoke a cigar! Wise as he is, he does it and does away with it. He does not let the thought to come again and again by just fulfilling once a queer demand. By throwing a crumb at the crow or a stray animal, it satisfies itself, it would not return again and again.

Likewise, pregnant women have strange demands for taste and food. They would like a piece of raw mango or a sour food item. They express from time to time, desire to eat things which they do not normally and regularly eat. The ancient Egyptians and the Indians till date honor such demands of the pregnant women. Health researchers rarely study these strange demands and trace deficiencies of the pregnant women. The physicians of the old had an understanding of the possible, mineral deficiencies that happen in pregnancy and were strongly recommending that the instinctual food and drink desires of the pregnant women be honored. Seldom pregnant women were treated with medicines of any kind, lest, they may have an impact on the growing child in the womb. The mothers were never treated with medicines even during post-delivery times to

prevent the impact of the medicine on the child through the milk that it draws from the mother. Such of these old traditions may have to be studied in right perspective so that the patients as well as the physicians would notice and honor the call from within the body.

It is of common knowledge that sometimes patients, during their sickness strongly desire certain foods. In so far as supply of such foods is not harmful, the patients should be supplied with. A satisfied psyche generates enough healing energies from within to assist the cure that is being attempted by the physician. The positive cooperation of the patient's psyche is a significant factor in cures. The patients cannot be treated en masse with standardized procedures and structures. After all, every human is unique and therefore requires the needed personal attention.

Today, in business and marketing, the professionals think of customizing the product as per the individual taste of the customer. It should much more be so in matters of food, health and medicine. Many times a patient is better off with marginal transmissions now and then than a patient who regiments himself with the given instructions. A little freedom always adds to boost up the psyche which in turn contributes to the process of healing.

Panchatantra Stories

6. The Jackal and the Drum

One day, a jackal was very hungry and was wandering about in search of food.

After some time, he wandered out of the jungle he lived in and reached a deserted battlefield.

In this deserted battlefield, a battle was fought recently. The fighting armies had left behind a drum, which was lying near a tree.

As strong winds blew, the branches of the tree got rubbed against the drum. This made a strange noise.

When the jackal heard the sound, he got very frightened and thought of running away. "If I cannot flee from here before I am seen by the person making all this noise, I will be in trouble."

As he was about to run away, he had a second thought. "It is unwise to run away from something without knowing. Instead, I must be careful in finding out the source of this noise."

He took the courage to creep forward cautiously. When he saw the drum, he realized that it was only the wind that was causing the noise.

He continued his search for food, and near the drum he found sufficient food and water.

The wise indeed say, "Only the brave succeed in life."

Wood and Gold

In 19th century there was found in the woods of West-India a mysterious ascetic. Nobody knew his origins or his plans. Swami Samartha, as he was called, used to sit undressed, meditating, under a tree. Being disturbed by visitors, he became angry. Once humbly a poor woodcutter touched his feet. The man wanted to earn his livelihood without cutting trees. The Swami told him: "The trees you will cut today are your last ones." The woodcutter did not understand, but he trusted the Swami and started his work. In the evening he saluted the holy man again. He wanted to show the wood pieces and opened his basket. But the wood was changed into pieces of Gold. "It is enough for you and your family. You will never cut trees again," Swami said. A poor man invited Swami Samartha to eat and to live with him. Swami agreed. But when they reached the hut of the man, the wife of the poor man got angry: "Are you mad to invite a guest. We do not have either enough to eat, nor enough place for sleeping." Swami Samartha quietly went outside. Next morning, he sat down at the kitchen stove, cleaned his bowels and disappeared. The wife had watched the scene and got furious. She wanted to accuse her husband for this behaviour of the guest. But the man calmed her: There was nothing than pure gold at the stove. The king of the province wanted to house Swami Samartha in his palace. He honoured the Swami and offered him a comfortable and costly suite. Swami entered the rooms and disappeared. He was found at the top of the palace and said: "I don't like the energies of the palace. I return to the wood. Better, you agree." The king discharged him.

Swami Samartha was the Master of Masters. He prepared the arrival of many masters and inspired people through his amazing deeds.

Picture of the Month of Cancer :

Cancer - Artemis, Layers of Reflection

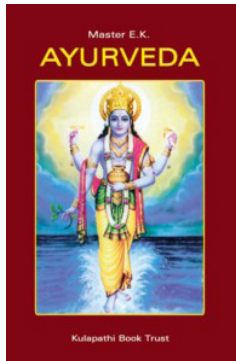

What we see as Sun is the reflection of the internal Sun-principle, as the externalised solar image. This reflection of the internal principle into the external brilliance is called "Moon principle". Our visible Sun is really the Moon of the Internal Sun. To our Earth the satellite Moon works out the Moon principle for the sunlight to reflect and be transformed into moonlight. Without the satellite Moon, our Earth would not have inherited minds for her children. The cosmic mind is realised by man through the rays of Neptune. The solar mind is realised through the rays of the Sun and the individual mind is felt through the rays of our satellite Moon.

Ayurveda

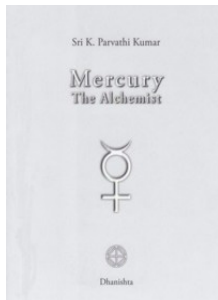

Ayurveda is the science of Life. The vital body, senses and the mind form the field of study of health and disease in Ayurveda. It is the habit-forming nature of man that is to be used positively as a preventive method for all diseases. Master E.K. has written a fine introduction to this vast subject and his intention is to reach a wide public audience, so that the language remains relatively non-technical.

Mercury - The Alchemist of the Age

Mercury is the golden middle principle that can compromise the high and the low, the left and the right, the male and the female, the positive and the negative, the spirit and the matter, and the Divine and the diabolic. Mercury is impersonal, and the one who is governed by Mercury is impersonal as well. He is the agent of divine alchemy, to synthesise seemingly divergent energies. Mercury is the friend with whom all agree.

He is the centre around which things tend to gather. Mercury is the light of the soul that soothes, heals, magnetises and thereby enlightens the surroundings very impersonally.

Great Invocation

Let us form
the circle of good will.
OMNIA VINCIT AMOS.
From the South
through love,
which is pure,
from the West
through wisdom,
which is true,
from the East
through will,
which is noble,
from the North
through silence,
which is golden.
May the light make
beautiful our lives.
Oh! Hierophant of our rite,
let his love shine.
OMNIA VINCIT AMOS.
Let us form the Circle of the
World Servers.

We bow down
in homage and adoration to
the glorious
and mighty hierarchy,
the inner government
of the world,
and to its exquisite jewel,
the star of the sea
– the World Mother.

From the point of light
within the mind of God,
let light stream forth
into the minds of men.
Let light descend on earth.

From the point of love
within the heart of God,
let love stream forth
into the hearts of men.
May the Lord return
to earth.

From the centre
where the will of God
is known,
let purpose guide
the little wills of men,
the purpose
which the Masters
know and serve.

From the centre
which we call
the race of men,
let the plan of love and
light work out,
and may it seal the door
where evil dwells.

From the Avatâr
of Synthesis
who is around,
let his energy pour down
in all kingdoms.
May he lift up the earth
to the kings of beauty.

The sons of men are one,
and I am one with them.
I seek to love, not hate.
I seek to serve,
and not exact due service.
I seek to heal, not hurt.

Let pain bring
due reward of light
and love.
Let the soul control
the outer form and life
and all events,
and bring to light
the love that underlies
the happenings of the time.

Let vision come and insight.
Let the future stand revealed.
Let inner union demonstrate
and outer cleavages be gone.

Let love prevail.
Let all men love.

Master DK

OH LORD AGNI!
WE PRAY THAT WE MAY BE LEAD
THROUGH THE PATHS OF RIGHTEOUSNESS (OF LIGHT),
FOR YOU KNOW THE LIGHTED PATHS OF THE UNIVERSE.
LEAD US, GUIDE US AND ENSURE THAT
ALL OUR KARMA IS BURNT ON THE WAY
AND THAT WE TEND TO BE THE LIGHTED BEINGS
IN THE ETERNAL KINGDOM OF LIGHT
TO SERVE IN JOY!
